RECYCLED PLASTIC BOTTLES IN OUR GARMENTS

We have updated our Stretch Twill and Stretch Oxford shell fabrics, as well as our interior basic taffetas, to use a blend of REPREEVE® recycled yarns which are made from at least 95% post-industrial and post-consumer waste. It's a difference that can be measured, not just claimed.

**TO DATE, VOLCOM HAS USED OVER
30 MILLION RECYCLED PLASTIC
BOTTLES IN OUR GARMENTS.**

REPREEVE®

RESPONSIBLE DOWN STANDARD

The goal of the Responsible Down Standard is to ensure that the water fowl in the down supply chain are treated humanely.

TEFLON EcoElite™

Teflon EcoElite™, used as a water repellency finish on select jackets throughout the line, is the first renewably sourced, plant-based and non-fluorinated fabric treatment for durable water repellency (DWR) and contains 60% renewably sourced content. The chemistry for Teflon EcoElite renewably-sourced finish (Zelan™ R3) is bluesign® approved and is recognized as a USDA-certified Biobased product, not made with genetically modified organisms.

PFCec FREE® DWR

We are committed to continuously reducing the environmental footprint of our products, this includes the elimination of PFCs of Environmental Concern (PFCec FREE®) by 2023.

As a step in this journey this product comes with a water repellent treatment free of PFCs of Environmental Concern.

GORE-TEX® BLUESIGN®

Statement from GORE-TEX®:

"At Gore Fabrics we offer products that provide comfortable, durable protection. Our products are safe to wear as they meet the criteria of the Oeko-Tex® Standard 100 and our fabrics manufacturing processes are environmentally sound as we have successfully implemented the bluesign® system in all our fabrics production sites.
